

**Quality, Integrity,  
Sustainability**

As one of only a small number of ranges in the world that have genuine organic certification, we are proud to be the only Australian range certified by NASAA (National Association for Sustainable Agriculture Australia), an organization widely respected for its rigorous adherence to internationally established organic accreditation standards.

As a growing factory direct business we are committed to working with organic growers, processors and retailers to expand the organics industry.

**DEDICATED TO ORGANICS**  
*Working towards an organic  
and sustainable future.*

## Elemental For the Body

**100% pure skin food, total body care!**

In this hyper-velocity world we live in, you can make the time to pamper your body! Pour Elemental into your bath; massage it into your skin; knead it into your feet; languidly, lavish your legs with luxurious layers of lotion; butter your beautiful body with bountiful balms!

### Elemental For Mothers

An extensive range of products for expecting and breast-feeding mothers that are designed to nourish, nurture and support even the most sensitive areas of your body.

### Elemental for Babies

Every parent wants to give their baby the best start in life. Precious and tender, their skin deserves to be treated with the utmost gentleness and care.

### Elemental for Men

Subtly scented and carefully blended, Elemental's unique range of products for men are designed to nourish, soften and protect the skin. Lightly scented and expertly blended!

### Elemental for Therapy

Whether you are a practitioner, or simply like to create your own blends, Elemental's extensive range of organic carrier and essential oils, floral hydrosols and ointments will help you achieve the results you want.

## Elements

### Certified Organic Rose Hip Oil

Rich in vitamins A, C and E, minerals and essential fatty acids, this oil is renowned for its capacity to revitalise the skin, retard wrinkles and improve the appearance of scars. An essential component of all the Elemental creams, lotions and oils.

### Certified Organic Jojoba Oil

A light waxy oil that mimics collagen and is rapidly absorbed into the skin.

### Certified Organic Macadamia Oil

A rich nourishing oil that replenishes the skin's own oil.

### Certified Organic Sweet Almond Oil

An energy and protein rich oil.  
Contains vitamins A, B1, B2, B6 and E.

### Certified Organic Avocado Oil

A nutrient rich oil containing lecithin and vitamins A, B and C.

### Certified Organic Hazelnut Oil

Has gentle toning properties and helps clarify oily skin.

### Certified Organic Evening Primrose Oil

A nourishing oil, rich in essential fatty acids.

### Certified Organic Aloe Vera Gel

Soothing, softening and refreshing.

### Certified Organic Lavender Water

Soothing, toning and anti-bacterial.

### Certified Organic Rose Water

Softening, toning and calming.

*Certified Organic and Natural Skin Care*

## Skin Vitality

At Elemental, we believe that Nature can provide the perfect balance allowing us to exclude the toxic components found in most skin care products.

Utilising the bounty and harmony of Nature we have created a unique range of products to meet your individual needs.

The truth of it is, when it comes to skin care, we can't provide miracles. Rest, fresh food, drinking plenty of water, exercise, and limited exposure to the sun, are the keys to healthy skin. Skin care is the little bit extra that gives your skin a fresh and vital glow.

## Skin Food

Our products are synergistically balanced and based on certified organic nut oils and flower waters that mimic and complement the skin's own natural processes.

*Elemental products are completely free of parabens, sulfates, petrochemical by-products and synthetic fragrances.*

To enhance the purity of these ingredients, only the freshest rainwater originating from the Southern Ocean is used.

### Unique Formulations and Exquisite Aromas

Each individual product has been carefully developed. The healing properties and delicate scents come from the aromatherapeutic blends of essential oils chosen for their different properties and the various emotional responses they evoke.

## Denmark, Western Australia

### *A piece of heaven on Earth*

Denmark is situated on the Southwest coast of Western Australia. Its pristine beaches and rugged coastline border the beautiful and virtually untouched Southern Ocean. Beyond is a background of magnificent Karri tree stands and lush undulating farmland.

It is the perfect location for the creation of our unique product range and our ongoing commitment to our business ideals of an organic and sustainable lifestyle.

## Elemental For The Face

### *100% pure skin food, total skin care!*

Many of the products in Elemental's face care range are available for three different skin types. Products created for 'dry, sensitive and mature' skin types are blended from the gentlest and most intensively nourishing ingredients. Products created for 'normal and combination' skin types utilise ingredients that create balance and harmony.

If your skin is younger, frequently oily and prone to pimples, we particularly recommend the 'oily & problem' skin type products as these are created with ingredients that clarify and tone.

### Daily Elemental

Skin food products used on a daily basis will nurture and nourish your face whilst working to support your skin's natural moisturising and balancing capabilities.

## Weekly Elemental

Skin care processes such as exfoliation are great to do every two or three

days if your skin is particularly oily. But for more sensitive skin, once or twice a week will restore its natural, vital glow!

Some treatments are so luxurious and special they require a ritual. Try one of Elemental's exquisite mud masks. Run the bath, light the candles, smooth it on and imagine yourself Queen of the Moment!

## Certified Organic & Natural Skin Care

Elemental Skin Care is a unique and extensive range of certified organic and natural skin care products designed to mimic and complement your skin's own natural processes.

### *100% Pure Skin Food!*

The majority of the Elemental products are certified organic and those that aren't contain more than 70% certified organic content or have been created with non-certifiable ingredients such as salt and clay.

## Packaged In Glass

Essential oils leach chemicals out of plastics. To preserve the integrity of the Elemental products, they are packaged in non-reactive materials such as glass, stainless steel and spun aluminium.
